2003-2004
- Stuntman Falköping Fx
2000-2004
- IT manager Cami AB
2002-2003

With my background in **project management** and experience in **implementing** software solutions, particularly in the IT/SaaS industry, I am excited about the opportunity to contribute to your team and support your organization.

At my previous roles, I have demonstrated **strong communication skills**, a **creative mindset**, and a results-driven approach, which I believe align well with the qualities you are seeking. I have successfully managed multiple projects simultaneously, ensuring quality and control while meeting project deadlines and budgets. Additionally, my experience in conducting workshops, training sessions, and providing support during various project phases will allow me to effectively guide Medius customers through the onboarding process.

I am fluent in both Swedish and English, enabling me to communicate effectively with stakeholders at all levels. My knowledge of IT systems, combined with my prior experience in management, different processes, and working as a consultant, positions me well to understand and address the needs this role.

Personality:

Calm	
Understanding	
Educational	
Innovative	
Creative	
Communication	
Fast learner

Miro	Cubase	HubSpot
MS SQL	VMWare	WordPress
GitHub		

Language skills:

Swedish – Native, very good knowledge of both speech and writing.
English – Very good knowledge of both speech and writing.
German – Limited knowledge.
Serbo-Croatian – Limited knowledge.
Spanish - Very limited knowledge.
Swedish sign language – Very limited knowledge.

Driving license:

A, B(96)

Fun about me

Ingenious already as a child but managed to split my finger. Won third prize in inventor competition in high school. I got the highest score on the aptitude test for the goldsmith education at the high school. Has been beaten bloody in front of a camera, been blown out of a window, and ridden western riding to the left. Sharpened sword for 24 hours, been robbed in Romania, I'm cooler than Joe Labero, was bullied by knights and received standing ovations for filming Romeo and Juliet. Rhymed on Manhego and drove a tractor for ten hours on a motocross track. As well as jumped out of planes, had a half Caribbean cruise blown away and sneaked on alligators in Florida.

In 2023 when I co-founded my own business, where I honed my skills in developing course materials for video lectures and freelancing in programming. In my recent roles as an application and software consultant, I have successfully managed projects, handled implementation tasks, configured systems, and provided comprehensive software training to clients. My experience has also involved extensive change management and improvement work, ensuring the smooth transition and optimization of systems for our clients.

Prior to that, at Falbygdens Ost, I gained valuable experience in managing various software, hardware, systems, and IT infrastructure, further enhancing my expertise in the field.

My passion for technology ignited in the mid-90s with the advent of PCs in households. This led me to delve into web design, mastering HTML and creating numerous websites for diverse clients. Over the years, I have expanded my skills in Photoshop, ASP, and VBA programming in Excel, developing innovative solutions and user-friendly applications.

Beyond my technical abilities, I bring leadership and motivational skills acquired through my background as a teacher, show artist, and stuntman. With a broad skill set, adaptability, and a keen ability to learn new technologies quickly, I am poised to take on challenges across various domains and deliver exceptional results. As a teenager, I had summer jobs during summer vacations, which allowed me to pay for my own driver's licenses. First, I obtained a license for a light motorcycle (up to 125cc) when I was 16, and then a car license when I turned 18. Later, I upgraded to a heavy motorcycle license. In the summer of 2018, I upgraded my B license to B96, which means I can drive some heavier vehicles.

During my middle school years, I aimed to become a goldsmith, following in my father's footsteps. As there were opportunities to choose art and technology as electives, I saw this as a chance to prepare for relevant skills. In high school, I studied the goldsmith program at Ållebergsgymnasiet and then completed an additional two years of goldsmith training at Lärcenter in Falköping. During this time, I developed a keen interest in computers and pursued web design training, self-learning extensively during my free time, including building computers with various hardware components and programming.

In my leisure time, when I was younger, I played a lot of soccer. I also enjoy music, playing the electric guitar and bass, although it has taken a back seat recently. I also have a passion for photography and filmmaking, as well as editing and post-production. More recently, I discovered motocross and enduro as an enjoyable and effective form of exercise, and I've found it so much fun that I compete in it to some extent. Since motorsport doesn't receive much media attention, I have written articles and taken photographs, which have been published in the local newspaper, in addition to writing and posting videos on my blog. Through this interest, I have served as the training coordinator in associations and as a track manager for an enduro Swedish Championship competition. In January 2019 and again in September 2020, I had the great fortune of becoming a father. What will my next adventure be?

Best Regards
Robert Ahlin
